

Are current nutrition assessment tools keeping your patients from **better outcomes**?

Bloodwork only tells me about nutrients in his blood

BMI doesn't tell me anything about her body composition

MyPlate doesn't help me build his better plate!

Food journal apps show me her calories & macros, but what about other nutrients & all those supplements she takes?

Genetic testing can tell me her health potential & some risks

**IT'S 2018
THERE HAS TO BE SOMETHING BETTER!**

Lab work, BMI, protein equations, genetic testing at best tell you part of their nutrition story.

TO BUILD THEIR BETTER NUTRITION PLAN, YOU NEED TO ASSESS THEIR TOTAL NUTRITION

INTRODUCING THE BETTER NUTRITION TOOLS

The **first** and **only** way to see if your patient/client's total nutrition choices are giving their body what it needs to run better!

Become a **Better Nutrition Provider** today to start using better nutrition tools to get better outcomes for your clients and your business. You (both) Deserve Better!

TheBetterNutritionProgram.com

Want a few ways to get them started for free?

Have them take the **better nutrition quiz** as part of your initial assessment and tell them to email their results to you!
